Church to Residential
Narberth, PA

This turn-of-the-century church is located within a beautiful residential neighborhood just steps away from the Narberth Septa Regional Rail Line. The concept is to convert the church into 12 rental units, using historic tax credits. The volume of space within the church provides for many opportunities to create two-story units with lofts and balconies. Many of the significant architectural elements will be preserved and used for the residential units. The units range from 650sf to 1,110 sf.

Project Details: Residential, Multi-Family, 13,000sf, Adaptive Re-use, Transit Oriented Development
